

Madeline George Landscape & Garden Design, together with its sister company Think Green Inc., a landscape construction firm, offer a full range of landscape design and build services, from consultation and design, through estimating, material selection, installation and construction. We are committed to providing the guidance and resources needed to create stylish and sustainable landscapes.

We encourage clients to participate in the design and build process as much as they desire. Our services are structured in an “a la carte” fashion to facilitate individual needs and interests. We can assist with any one, or all phases of a project; be it a small garden design, the installation of a sprinkler system and large plant materials, or the development of a full scale master landscape plan and complete construction of the project. While a majority of our work is residential, we have designed and installed many key commercial projects and parks, including JUMP in downtown Boise.

We are based in Boise, Idaho, with the majority of our design and build work performed in Boise, Eagle, Hidden Springs, Meridian and McCall. We are a team of creative designers, talented craftsman and experienced installation crews who are eager to assist you with your landscape project.

Please contact Kecia Carlson to discuss your project!

Sport Court and Play Areas
Pools, Spas and Hot Tubs
Outdoor Lighting
Retaining Walls

Design. Our designers strive to understand the many criteria of a site in order to develop a design that meets your needs and brings all elements of the landscape into balance and harmony. Emphasis is placed on getting the right plant for the right place while creating year round seasonal interest in your landscape. We practice water conserving irrigation methods and environmentally friendly design. Our designers love staying abreast of industry trends and enjoy setting new trends in landscape and garden design!

Build. Our installation and construction crews are experienced in all aspects of landscape construction, and well trained in proper soil preparation and irrigation systems. We pay attention to detail and keep the job site neat.
